1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 10, line 21, "control for controlling said mold means opening means" has been changed to --control means for controlling said mold opening means-- (as is recited in original claim 10).

2. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or fairly suggest a mold clamping unit including a mold clamping cylinder for moving the movable mold plate between a fully open position and a closed position, mold opening means for applying a mold opening force to the movable mold plate and moving the movable mold plate from the closed position to a predetermined half-open position, the mold opening means being independent of the mold clamping cylinder, switching means for switching a mold clamping force generated by the mold clamping cylinder between a first mold clamping force larger than the mold opening force and a second mold clamping force smaller than the mold opening force by switching the supply pressure of the working fluid supplied to the mold clamping cylinder, and control means for controlling the mold opening means and the switching means, as claimed in claims 1, 10, 18 and 19. While the prior art of record discloses mold opening means independent of a mold clamping cylinder with clamping force switching means and control means, such prior art does not teach or fairly suggest the mold opening means moving the movable mold plate from the closed position to a half-open position with the

independent mold clamping cylinder moving the movable mold plate between a fully open position and a closed position, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
